

ENGINEERING SERVICES

Electrical/Mechanical Engineering Services

- Product design and development
- Concept through finished products
- Complete document package
- Electrical and mechanical box builds

Reverse Engineering

- Electrical and Mechanical
- End of life legacy product support
- Obsolete component alternatives
- PCB re-creation and schematic layout

Wiring Diagrams

- Documentation services
- Revision level component verification

Test System Design

- Accelerated life test systems and fixtures
- In-circuit functional test systems
- Go/No-Go mechanical fixture design
- Assembly fixturing and tooling
- Automated test fixtures / Custom PCB

Prototype Design

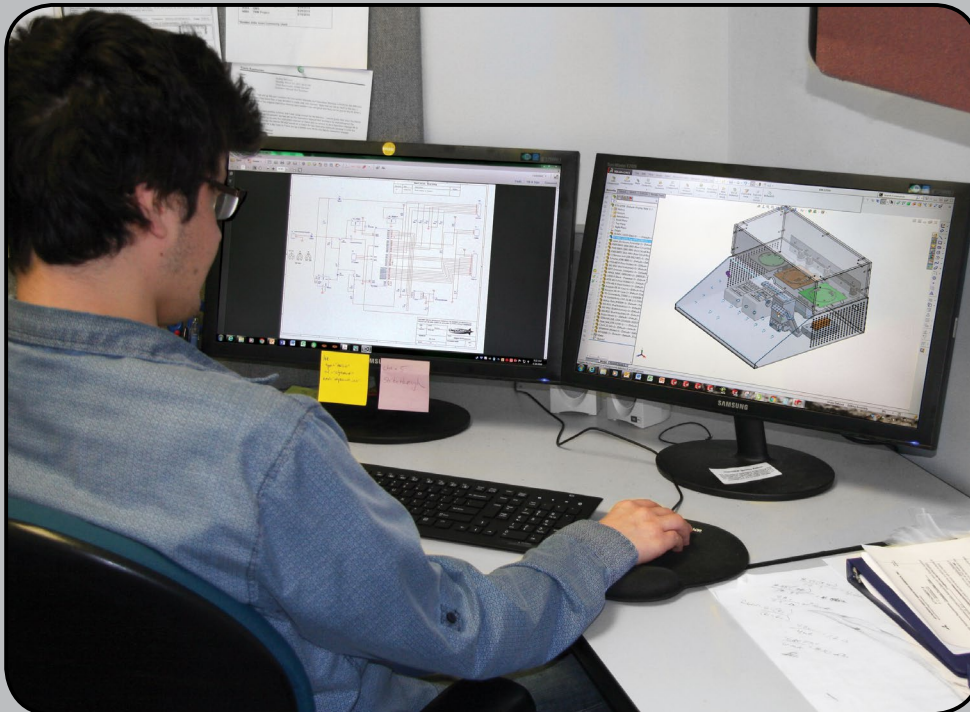

- Design and build

PC Board Layout

- Single layer / multi-layer

3D Modeling

- Solid Works - 3D
- Mechanical design / modeling

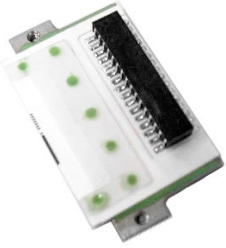

For 20 years, **DepotStar, Inc.** has supported the following industries:

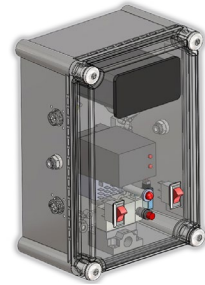

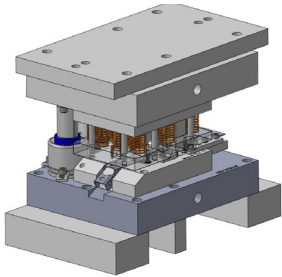

- Aviation and Aerospace
- Automotive
- Banking
- Beverage Service Providers
- Computer
- Industrial
- Medical Device Manufacturers
- Military and Defense
- Printing
- Recreational Vehicle
- Original Equipment Manufacturers (OEM)
- Third Party Maintenance Organizations
